How can Isaac support secondary science teachers?

- Students who use Isaac Science regularly show evidence-based improvement in exam grades and success in getting into good universities.
- Teachers who use Isaac Science regularly save hours in planning, marking and assessment. On average, 4-5 hours per week!

**making
physics
matter**

What do teachers say about Isaac?

- I have over 30 years experience of teaching A level physics and I find the range and scope of the questions available on Isaac Physics challenging, inspirational, and able to explore problem solving in a way that links ideas across the specifications I teach. (A)
- Without Isaac Physics I'm not sure how long I would want to remain teaching physics. It is an essential part of my teacher's toolkit, it saves so much workload in marking pupils' equation drill practice.
- Isaac Physics is by far the single biggest influence on my physics teaching over the last ten years. It's the best source of training, content, discussion and challenge for students that I know of. It's a brilliant resource and long may it continue. (RW)

- The community is very willing to share resources, tips, solutions and makes my life easier as a physics teacher. (TH)

How to get started with Isaac Science:

1. Sign up for an account

<https://isaacscience.org/register>

2. Request an upgrade to a Teacher account

Hello!

Here, you can create an Isaac Science account, or log in to an existing one.

Create a new account with your email:

[Continue with email](#)

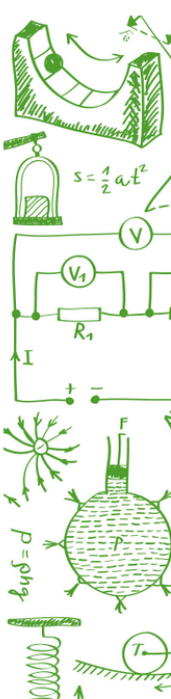

Or log in with:

[Google](#)

[Microsoft](#)

Already have an account?

[Log in](#)

Or use the Contact Us form at the bottom of the home page

Account details

Here you can see and manage your account details for Isaac Science.

You have a **student** account. If you are a teacher or tutor, you can [upgrade your account](#).

If you would like to delete your account, please [click here](#).
