

Chemistry A Level Resources

Chemistry questions can be found using the Question Finder:

<https://isaacphysics.org/gameboards>

The image below shows the fields and topics covered within chemistry:

Question sources & types

Our chemistry questions are a mix of original questions, past paper exam questions, and questions from competitions. There are different input formats: multiple-choice, drag-and-drop, short text input, numerical and also questions where the answers are algebraic expressions, chemical formulae or chemical equations (we have a special input interface for these). For organic questions, we make use of an external online editor.

Example questions

Some example questions spanning a range of topics, difficulty, and question types can be found using the following link or QR code:

[Showcasing A Level Chemistry on Isaac](https://bit.ly/isaac_chem) (bit.ly/isaac_chem)

Book(s)

An Isaac Physical Chemistry book, featuring a subset of questions on the site, is available. A book compiling some of the organic and inorganic questions is currently in progress.

Isaac Chemistry WhatsApp group

There is an Isaac Chemistry WhatsApp group for teachers which you can join using the QR code on the right.

Contact us

If you have any questions, feedback, or suggestions, please email Andrea Chlebkova, Senior Project Chemist, using one of the email addresses below.
