

# Developing Training “Culture is King”

Promoting the use of Isaac Physics

Jed Marshall

@MarshallPhysics

# The context

- Previous support coach gave the department a set of Isaac Physics books
- On my first visit was told they “**dislike Isaac Physics because they have no answers – not confident we can solve questions**”
- What is an appropriate next stage strategy?

Your thoughts?

- The school has no Physics specialist
- Perhaps 2-3 out of the team tried using Isaac Physics
- They are not confident solving questions
- They have little experience using the website

# My thoughts

- **Modelling** good practice: dedicated CPD where we sat and solved questions together – showcasing how it can interleave into SoW
- Developing positivity: praising teachers for their “**you work it out**” mentality – highlighting how I often need support/time.
- Promoting wider offer: It is not just a book! Masterclasses, CPD, extra questions.
