

Chemistry A Level Resources

Chemistry questions can be found using the Question Finder:

<https://isaacphysics.org/gameboards/new?subjects=chemistry>

The image below shows the fields and topics covered within chemistry:

Question sources & types

Our chemistry questions are a mix of original questions, past paper exam questions, and questions from challenges such as the Cambridge Chemistry Challenge. There are different input formats: some questions are multiple-choice, or drag-and-drop, others ask for short text input, but we also have numerical questions and questions where the answers are algebraic expressions, chemical formulae or chemical equations (we have a special input interface for these). For organic questions, we make use of an external online editor.

Example questions

Some example questions spanning a range of topics, difficulty, and question types can be found here (follow either the links or QR code):

[Showcasing A Level Chemistry on Isaac](http://bit.ly/isaac_chem) (http://bit.ly/isaac_chem)

Book(s)

An Isaac Physical Chemistry book, featuring a subset of questions on the site, is available. A book compiling some of the organic and inorganic questions is currently in progress.

Contact us

If you have any questions, feedback, or suggestions, please email Andrea Chlebikova, Senior Project Chemist, using one of the email addresses below.
