# Physics Resources from 11 to University

Questions from our books and problem-solving selection are found using the

**Question Finder:** <https://isaacphysics.org/gameboards>

Practice boards of questions, lessons and revision resources are found using the **drop-down learn menu**.

All our questions have hints and are **automarked with feedback**.

All our questions are categorised by **stage and difficulty** and our GCSE and A Level book boards of questions are linked to exam board specification tables.

## Question sources and types

Our physics resources are a mix of original questions, past paper exam questions and questions from competitions. There are different input formats: multiple-choice, drag-and-drop, short text input, numerical and also questions for which the answers are algebraic expressions or nuclear equations (we have a special equation editor for these, or students can type in using code).

## Books

## Free online masterclasses and mentoring

We have free online Saturday masterclasses for GCSE and A Level each term and also offer additional workshops: book now via our regularly-updated [Events Page](#).

We also offer a free mentoring scheme for Years 11, 12 and 13: [sign up](#) at any time: [https://isaacphysics.org/pages/isaac\\_mentor](https://isaacphysics.org/pages/isaac_mentor).

Y12 students can sign up for the [Senior Physics Challenge](#) (SPC): <https://isaacphysics.org/pages/spc>
