

Physics Resources from 11 to University

Welcome to Isaac Physics, part of Isaac Science! The place to learn maths and science by solving problems. Questions from our books and problem-solving selection are found using the **Question Finder**: <https://isaacscience.org/questions>

Practice question decks, tests and revision resources are found using the **drop-down explore menus**.

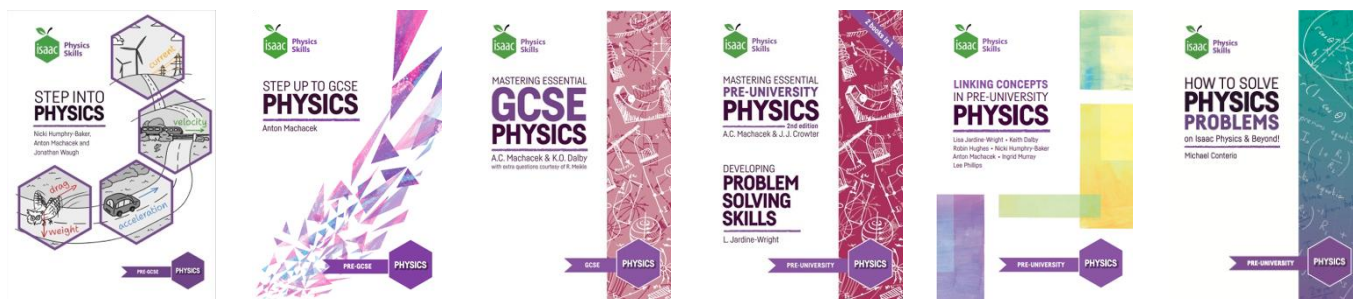

All our questions have hints and are **automarked with feedback**.

All our questions are categorised by **stage and difficulty** and our GCSE and A Level book question decks are linked to exam board specification tables.

Question sources and types

Our physics resources are a mix of original questions, past paper exam questions and questions from competitions. There are different input formats: multiple-choice, drag-and-drop, short text input, numerical and also questions for which the answers are algebraic expressions or nuclear equations (we have a special equation editor for these, or students can type in using code).

Books

Free online masterclasses and mentoring

We have free online Saturday masterclasses for GCSE and A Level each term and also offer additional workshops: book now via our regularly-updated [Events Page](#).

We also offer a free mentoring scheme for Years 11, 12 and 13: [sign up](#) at any time: https://isaacscience.org/pages/isaac_mentor.

Y12 students can sign up for the [Senior Physics Challenge](#) (SPC): <https://isaacscience.org/pages/spc>
