

## Pressure

**Pressure** tells us whether a **force** is **focused** or **spread out** over an **area**.

When you push a **drawing pin** into a wall with your thumb, the **small area** of the point has a very **high pressure**. The point goes into the wall. The flat bit you push has a **larger area**. The **force** is more **spread out**. There is **less pressure** which is why it doesn't go into your thumb.

1 Do these situations need high or low pressure? How did you

(a) Cat's claws when it climbs a tree

(b) Standing on soft snow when you don't want to sink in

(c) A tractor's wheels in a muddy field

(d) Scissor blades cutting paper

2 Fill in the gaps to complete the explanation:

A bar of chocolate has six chunks joined with thinner pieces of chocolate. When you try to bend the bar, the \_\_\_\_\_ is greatest where the bar is \_\_\_\_\_. This helps you break off one chunk of chocolate at a time.

3 A chef is chopping carrots with a sharp knife. Complete the table to compare the force, pressure and area of the knife handle with its blade. Choose from the words **larger**, **smaller** and **equal**.

	On handle compared to blade edge,
Area	area is
Pressure	pressure is
Force	force is

A pressure of  $30 \text{ N/cm}^2$  means that there is a force of **30 N** on each **square centimetre**.

4 A chair leg puts a pressure of  $10 \text{ N/cm}^2$  on the floor.

(a) Complete the sentence: The force on  $1 \text{ cm}^2$  of the floor is  newtons.

(b) Work out the force on  $6 \text{ cm}^2$  of floor using an equation.

$$\begin{array}{rclclcl}
 \text{force (N)} & = & \text{pressure (N/cm}^2\text{)} & \times & \text{area (cm}^2\text{)} \\
 \text{[ ]} & = & 10 & \times & 6
 \end{array}$$

(c) Work out the force on the floor due to one  $16 \text{ cm}^2$  chair leg using an equation.

$$\begin{array}{ccccc} \text{force (N)} & = & \text{pressure (N/cm}^2\text{)} & \times & \text{area (cm}^2\text{)} \\ \boxed{\phantom{000}} & = & \boxed{10} & \times & \boxed{16} \end{array}$$

(d) Work out the force for the total  $64 \text{ cm}^2$  area of the chair legs.

---

5 Calculate the force on these areas if the pressure is  $20 \text{ N/cm}^2$ .

(a)  $2 \text{ cm}^2$

(c)  $30 \text{ cm}^2$

(b)  $4 \text{ cm}^2$

(d)  $0.04 \text{ cm}^2$

---

6 A  $200 \text{ N}$  force is spread over a  $40 \text{ cm}^2$  area.

(a) Force on  $1 \text{ cm}^2 = \boxed{\phantom{000}} \div \boxed{\phantom{000}} = \boxed{\phantom{000}}$  newtons

(b) Complete the sentence: The pressure (in  $\text{N/cm}^2$ ) is  $\boxed{\phantom{000}}$ .

(c) A  $100 \text{ N}$  force is applied over  $25 \text{ cm}^2$ . Work out the pressure using an equation.

$$\begin{array}{ccccc} \text{force (N)} & = & \text{pressure (N/cm}^2\text{)} & \times & \text{area (cm}^2\text{)} \\ \boxed{100} & = & \boxed{\phantom{000}} & \times & \boxed{25} \end{array}$$

(d) Work out the pressure if  $80 \text{ N}$  is applied over an area of  $20 \text{ cm}^2$ .

(e) Work out the pressure when a  $30 \text{ N}$  TV sits on a base with an area of  $600 \text{ cm}^2$ .

---

7 Calculate the pressure for these forces and areas.

(a)  $60 \text{ N}$  over  $3 \text{ cm}^2$ ,

(b)  $20 \text{ N}$  over  $0.2 \text{ cm}^2$ ,

---

8 A pump compresses air in a football to a pressure of  $10 \text{ N/cm}^2$ .

(a) What is the force on  $1 \text{ cm}^2$ ?

(b) The outwards force on the whole football is  $15\,000 \text{ N}$ . How many  $10 \text{ N}$  forces is this?

(c) What is the area of the football? (Each  $10 \text{ N}$  force acts on  $1 \text{ cm}^2$ .)

(d) Work out the area for a 90 N total force using an equation.

$$\begin{array}{ccccc} \text{force (N)} & = & \text{pressure (N/cm}^2\text{)} & \times & \text{area (cm}^2\text{)} \\ \boxed{90} & = & \boxed{10} & \times & \boxed{\phantom{000}} \end{array}$$

(e) Work out the area for a force of 600 N.

---

9 A force is 300 N. Calculate the area to make these pressures.

(a) 150 N/cm<sup>2</sup>

(c) 15 N/cm<sup>2</sup>

(b) 30 N/cm<sup>2</sup>

(d) 600 N/cm<sup>2</sup>

---

10 Complete the word equations using **force**, **pressure** and **area**.

(a) force =

(b) pressure =

(c) area =

11 Rewrite your word equations using symbols.

$F$  is the force,  $P$  is the pressure and  $A$  is the area.

(a)  $F =$

(b)  $P =$

(c)  $A =$

---

12 Use your understanding of pressure, or the equations, to calculate

(a) the pressure when a 48 N force squeezes a 1.2 cm<sup>2</sup> stamp,

(b) the force when a 20 N/cm<sup>2</sup> pressure fluid pushes a 5 cm<sup>2</sup> piston,

(c) the area if a 900 N force makes a 90 N/cm<sup>2</sup> pressure.

---

Areas can also be measured in square metres.  $1 \text{ m}^2 = 100 \text{ cm} \times 100 \text{ cm} = 10\,000 \text{ cm}^2$ .

A pressure of 50 000 N/m<sup>2</sup> can also be written as 50 000 **Pa** (pascals) or 50 **kPa** (kilopascals).

13 A van with weight 25 000 N is supported by tyres with total area 0.25 m<sup>2</sup>. Calculate the

(a) pressure in kPa,

(b) area in cm<sup>2</sup>,

(c) pressure in N/cm<sup>2</sup>.
