

Single or Double Maths?

We have **two Maths streams** in STEM SMART:

- **Single Maths** covers **all** of the content in **A-level Maths**.
- **Double Maths** covers **all** of the content in **A-level Maths** and **most** of the content in **A-level Further Maths** (it covers Core Pure, Further Mechanics and Further Statistics, but only a little of Further Pure / Additional Pure, and no Decision / Discrete).

Which **stream** should you choose?

If you are unsure, then perhaps start with **Double Maths**.

It's possible to switch from Double to Single at a later point, but it's not feasible to do the reverse.
