

Ideal Gases 2

Essential Pre-Uni Chemistry C1.2

Subject & topics: Chemistry | Foundations | Gas Laws Stage & difficulty: A Level C1

Use the ideal gas equation of state to answer the following questions. In SI units, the equation is pV=nRT, where $R=8.31\,\mathrm{J\,K^{-1}\,mol^{-1}}$.

Part A

Pressure of the gas at $85\,\mathrm{cm}^3$

 $50\,\mathrm{cm^3}$ of gas at a pressure of $2.5\,\mathrm{atm}$ is allowed to expand slowly at constant temperature until it fills a volume of $85\,\mathrm{cm^3}$. Calculate the new pressure of the gas.

Part B

Volume of gas

 $20\,{
m dm^3}$ of gas at a pressure of $750\,{
m torr}$ is compressed slowly at constant temperature until the pressure reaches $3.0 \times 10^5\,{
m torr}$. Calculate the volume now occupied by the gas.

Part C

New pressure

A sealed, rigid container of air at $1.0\,\mathrm{atm}$ pressure falls in temperature from $296\,\mathrm{K}$ to $270\,\mathrm{K}$. Find the new pressure inside the container.

Part D New temperature
If the temperature of a gas measured in kelvin is doubled and the gas is initially at $17^{\circ}\mathrm{C}$, give its new temperature in $^{\circ}\mathrm{C}$.
Part E Temperature to explode
A canister of gas will explode once the pressure exceeds $40\mathrm{atm}$. If the pressure inside is $8.0\mathrm{atm}$ at $20^\circ\mathrm{C}$, find the temperature at which the canister will explode.
Part F New volume
A sac of gas freely changes its volume to keep its internal pressure equal to atmospheric pressure. If the sac has a volume of $1.2\mathrm{m}^3$ at $-10^\circ\mathrm{C}$ and then warms up to $17^\circ\mathrm{C}$ with no change in pressure, find its new volume.

Ideal Gases 4

Essential Pre-Uni Chemistry C1.4

Subject & topics: Chemistry | Foundations | Gas Laws Stage & difficulty: A Level P1

Use the ideal gas equation of state to answer the following questions. In SI units, the equation is pV=nRT, where $R=8.31\,\mathrm{J\,K^{-1}\,mol^{-1}}$.

A gas cylinder is being filled with argon gas. The gas cylinder has a volume of $24\,\mathrm{dm^3}$ and holds $1\,\mathrm{mol}$ of gas at room temperature and pressure.

Part A Amount of gas

Calculate the amount of gas (in moles) which must be added to raise the pressure in the cylinder from $1\,\mathrm{atm}$ to $250\,\mathrm{atm}$. Assume that the volume and temperature are constant. Give your answer to 3 significant figures.

Part B

New pressure

If the gas cylinder in Part A contains a pressure of $250 \, \mathrm{atm}$ at $20 \, ^{\circ}\mathrm{C}$, and is caught in a fire, so that its temperature is raised to $350 \, ^{\circ}\mathrm{C}$, calculate the new pressure inside the cylinder. Give your answer to 3 significant figures.

Question deck:

Ideal Gases 7

Essentia	. Pre-	Uni C	Chemi	istry	C1.7
----------	--------	-------	-------	-------	------

Subject & topics: Chemistry | Foundations | Gas Laws Stage & difficulty: A Level C1

Use the ideal gas equation of state to answer this question. In SI units, the equation is pV=nRT, where $R=8.31\,\mathrm{J\,K^{-1}\,mol^{-1}}$.

When $2.0\,\mathrm{moles}$ of a gas mixture at $1\,\mathrm{atm}$ and $296\,\mathrm{K}$ is compressed to half its original volume, the temperature rises to $312\,\mathrm{K}$ and the pressure rises to $1.7\,\mathrm{atm}$. Some of the gas slowly leaks out during compression.

Calculate the amount of gas present in the smaller volume.

Question deck:

Ideal Gases 8

Essentia	l Pre-Uni	Chemistry	y C1.8
----------	-----------	-----------	--------

Subject & topics: Chemistry | Foundations | Gas Laws Stage & difficulty: A Level C1

Use the ideal gas equation of state to answer this question. In SI units, the equation is pV=nRT, where $R=8.31\,\mathrm{J\,K^{-1}\,mol^{-1}}$.

A vacuum line is lowered to a pressure of $1.3\,\mathrm{kPa}$ at $77\,\mathrm{K}.$

Give the number of molecules of gas per mm^3 .

Question deck:

Ideal Gases 9

Essential	Pre-Uni	Chemistry	y C1.	.9
-----------	---------	-----------	-------	----

Subject & topics: Chemistry | Foundations | Gas Laws Stage & difficulty: A Level C1

Use the ideal gas equation of state to answer the following questions. In SI units, the equation is pV=nRT, where $R=8.31\,\mathrm{J\,K^{-1}\,mol^{-1}}$.

The endothermic reaction between sodium hydrogencarbonate and ethanoic acid is used to inflate a plastic bag.

Part A

Find the volume at $101\,\mathrm{kPa}$

If the gas produced is at a temperature of $13\,^{\circ}\mathrm{C}$, and $4.0\,\mathrm{g}$ of sodium hydrogenearbonate reacts with excess acid, find the volume of gas produced at a pressure of $101\,\mathrm{kPa}$.

Part B

New volume

If the gas then warms up to a room temperature of $32\,^{\circ}\mathrm{C}$ with no change in pressure, find the new volume of gas.

Question deck:

Equilibrium Constant 2

Essential Pre-Uni Chemistry I1.2

Subject & topics: Chemistry Physical Equilibrium Stage & difficulty: A Level P1	Subject & topics: Chemistry	Physical Equilibrium	Stage & difficulty: A Level P1
---	-----------------------------	------------------------	--------------------------------

Write balanced equations to show the equilibria represented by the following equilibrium constants, $K_{
m p}$.

	_
Part A	
(a)	
$rac{p \ (ext{Cl})^2}{p \ (ext{Cl}_2)}$	
$\frac{p(C_0)}{q(C_0)}$	
F (~-2)	
	_
B 1B	
Part B	
(b)	
$n/(20.)^2$	
$rac{p\left(\mathrm{SO}_3 ight)^2}{p\left(\mathrm{SO}_2 ight)^2p\left(\mathrm{O}_2 ight)}$	
$p(\Theta_2) p(\Theta_2)$	
	_
Part C	
(c)	
$rac{p (\mathrm{CO})^2 p (\mathrm{H_2})^2}{p (\mathrm{CH_4}) p (\mathrm{CO_2})}$	
$p(CH_4)p(CO_2)$	

Question deck:

Equilibrium Constant 3

Essential Pre-Uni Chemistry I1.3

Complete the following table:

TOTAL PRESSURE	MOLE FRACTION	PARTIAL PRESSURE
$1.0\mathrm{atm}$	0.075	(a)
125 MPa	4.00×10^{-7}	(b)
$4.0 m lbft^{-2}$	0.30	(c)
$50\mathrm{bar}$	(d)	$200\mathrm{mbar}$
$2.0\mathrm{GPa}$	(e)	40 kPa
(f)	$2.5 imes10^{-3}$	$1.4 imes 10^4 \mathrm{Pa}$
(g)	80 %	$120\mathrm{mmHg}$

Where only one of total and partial pressure is given, use the same units for the other.

Part A (a)			
Partial pressure (a)			

Part B (b)			
Partial Pressure (b)			

Part C (c)		
Partial Pressure (c)		
Part D (d)		
Mole Fraction (d)		
Part E (e)		
(e)		
(e)		
Mole fraction (e) Part F		

Part G (g)			
Total pressure (g)			

Question deck:

Equilibrium Constant 5

Essential Pre-Uni Chemistry I1.5

Subject & topics: Chemistry | Physical | Equilibrium Stage & difficulty: A Level P2

The reaction

$$A+B \Longrightarrow 2\,C$$

occurs in the gas phase. Its value of $K_{\rm p}$ at a temperature of $600\,{\rm K}$ is 2500. Each row in the table below shows possible partial pressures at equilibrium at $600\,{\rm K}$. Find the missing value in each row.

$p(\mathrm{A})$	$p(\mathrm{B})$	$p(\mathrm{C})$
20 kPa	$20\mathrm{kPa}$	(a)
$1.00\mathrm{MPa}$	(b)	$100\mathrm{MPa}$
$12.5\mathrm{cm}\mathrm{H}_2\mathrm{O}$	$3.75\mathrm{cm}\mathrm{H}_2\mathrm{O}$	(c)
(d)	$4.0 imes10^6\mathrm{torr}$	$1.60 imes 10^8 \mathrm{torr}$
$8.0 imes 10^{-4}\mathrm{atm}$	$5.0 imes 10^{-4}\mathrm{atm}$	(e)

Use the same units for your answers as those used in that row of the table.

Part A (a)		
Partial pressure (a)		

Part B (b)
Partial pressure (b)
Part C (c)
Partial pressure (c)
Part D (d)
Partial pressure (d)
Part E (e)
Partial pressure (e)

Question deck:

Equilibrium Constant 8

Essential Pre-Uni Chemistry I1.8

The reaction

$$\mathrm{CH_4} + \mathrm{H_2O} \mathop{\Longrightarrow}\nolimits \mathrm{CO} + 3\,\mathrm{H_2}$$

has an equilibrium constant, K_p , of $150.5\,\mathrm{Pa^2}$ at a temperature of $1073\,\mathrm{K}$. [1]

$$K_p = rac{p\left(\mathrm{CO}
ight)p\left(\mathrm{H_2}
ight)^3}{p\left(\mathrm{CH_4}
ight)p\left(\mathrm{H_2O}
ight)}$$

Part A

(a)

If the partial pressures at equilibrium are $p({
m CH_4})=20.0\,{
m kPa}$, $p({
m H_2O})=20.0\,{
m kPa}$ and $p({
m CO})=50.0\,{
m kPa}$, find the partial pressure of hydrogen at equilibrium.

Part B

(b)

If equal amounts of methane and steam are mixed and allowed to reach equilibrium, and the partial pressures $p({
m CO})=40.0\,{
m kPa}$ and $p({
m H_2})=120\,{
m kPa}$, find the partial pressure of methane at equilibrium.

Once the gases have reached equilibrium, the total pressure is suddenly doubled by the engineer. Will the following increase, decrease or stay the same as the system reaches a new equilibrium?	Part C (c)	
increase stay the same decrease Mole fraction of CO increase stay the same decrease Mole fraction of CH ₄ increase stay the same decrease stay the same stay the same stay the same stay the same	Once

Question deck:

Equilibrium Constant 6

Essential Pre-Uni Chemistry I1.6

The reaction

$$A+B \Longrightarrow 2\,C$$

occurs in the gas phase. Its value of $K_{\rm p}$ at a temperature of $600\,{\rm K}$ is 2500.

The table below shows initial pressures before equilibration at $600\,\mathrm{K}$. Calculate the equilibrium pressures in each case. Assume that the total gas pressure is kept constant.

Initial $p(\mathrm{A})$	Initial $p(\mathrm{B})$	Initial $p(\mathrm{C})$	Equilibrium $p(\mathbf{A})$	Equilibrium $p(\mathrm{B})$	Equilibrium $p(\mathbf{C})$
$10.0\mathrm{atm}$	$10.0\mathrm{atm}$	$0.0\mathrm{atm}$	(a)	(b)	(c)
$0.0\mathrm{MPa}$	$0.0\mathrm{MPa}$	$12.0\mathrm{MPa}$	(d)	(e)	(f)
$250.0\mathrm{bar}$	$250.0\mathrm{bar}$	$0.0\mathrm{bar}$	(g)	(h)	(i)
$0.00\mathrm{psi}$	$0.00\mathrm{psi}$	$2400.00\mathrm{psi}$	(j)	(k)	(l)

Give your answers in the same units as those used in that row.

Part A			

Equilibrium pressure (a). Give your answer to 3 significant figures.

Part B (b)
Equilibrium pressure (b). Give your answer to 3 significant figures.
Part C (c)
Equilibrium pressure (c). Give your answer to 3 significant figures.
Part D (d)
Equilibrium pressure (d). Give your answer to 3 significant figures.
Part E (e)
Equilibrium pressure (e). Give your answer to 3 significant figures.

Part F (f)
Equilibrium pressure (f). Give your answer to 3 significant figures.
Part G (g)
Equilibrium pressure (g). Give your answer to 4 significant figures.
Part H (h)
Equilibrium pressure (h). Give your answer to 4 significant figures.
Part I (i)
Equilibrium pressure (i). Give your answer to 4 significant figures.

Part J (j)
Equilibrium pressure (j). Give your answer to 4 significant figures.
Part K (k)
Equilibrium pressure (k). Give your answer to 4 significant figures.
Part L (I)
Equilibrium pressure (l). Give your answer to 4 significant figures.
