STEM SMART Physics 26 - Collisions >

Neutron Moderator

100 Challenge Problems in Pre-Uni Physics Q78

Subject & topics: Physics | Waves & Particles | Nuclear **Stage & difficulty:** A Level C2

A fast moving neutron produced from a nuclear reaction undergoes collisions with initially stationary moderator particles.

A neutron undergoes three successive head-on elastic collisions with identical stationary moderator particles. Its speed is reduced to 60.6% of its initial value.

Find the mass of one moderator particle.
