Isaac Science: How to roll out across a MAT

Presentation by Sarah Goodman

Physics teacher at Stockton Sixth Form College

Isaac Science: How to roll out across a MAT

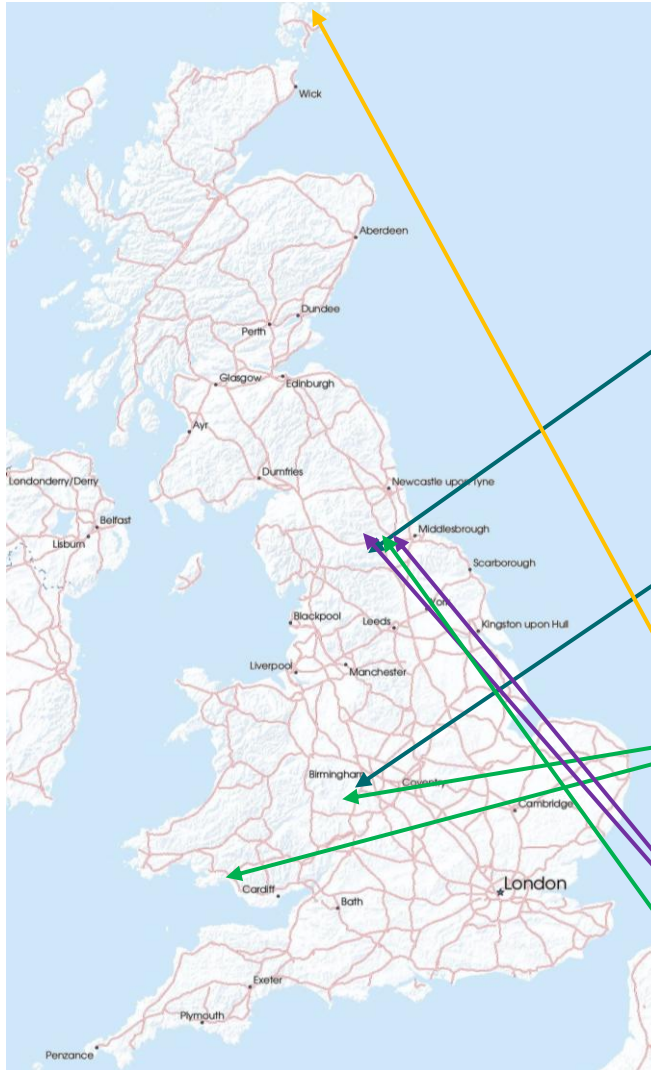

Outcomes

- How to canvas support.
- Identify key players in the Central Executive Team.
- Create your pitch.
- Deliver your pitch.
- Manage rollout.

A pitted CV ...

- Educated in NE England - Risedale and Richmond
- No Physics until A level
- B.Sc. (Hons) Physics - Birmingham University
- P.G.C.E. Birmingham University
- Probationary year incomplete
- F.E. sector 1990-2000
- Comprehensive 11-18 2000-2005
 - Chaired West Midlands Physics Centre
- Parenting break
- Private sector 2016-2024
- FE sector 2024-date

20/04/2026

How to canvas support.

- Listen to colleagues in Science and Mathematics.
- Talk about how Isaac Science reduces your marking time and the photocopying bill.
- Talk about using the books if mobile/portable devices are not allowed in your workplace.
- Identify one person from each specialism (Biology, Chemistry, Mathematics, Physics) who is willing to take part in a trial then identify a possible class.

Identifying key players in the MAT Central Executive Team.

- Survey the MAT website and Linkdin looking at the key players.
- Is there someone who knows and respects you?
- Is there someone responsible for inclusion, differentiation etc.?
- Repeat for your own setting and ask colleagues for advice.
- Does the Computing department know about ADA?
- Meet with your HOD and setting head and arrange a meeting with CET member.
- For me, we had a new CET. An introductory meeting was arranged for the whole staff by them. I approached our CEO and asked her who I should speak to at the end of the meeting.

Creating your pitch.

- Decide on a tone/format that is successful in your MAT
- Book a call with one of the Isaac team.
 - I arranged a Teams meeting with Ingrid and Anton in collaboration with my CET contact.
- Schedule a planning meeting with CET/MAT contact
- Focus on what Isaac Science offers in **your** setting.
 - Physics across the age range so something there for all settings, Mathematics from GCSE 9-1 so valid across all settings including PRU and primary, Advanced Mathematics, Chemistry, Biology so valid for Prior and Stockton.

Delivering your pitch.

- Assume CET knows nothing about Isaac Science.
- Origins – focus on funding and free to use.
- Benefit to your setting
 - Free, impactful, easy to use across platforms, not just Physics!
- Historical impact – independent UCAS study 2025
- Workload
- Skills books
- Aims and evaluation
- How it will work in different settings across the MAT
- Rollout plan

Managing rollout.

- Create an 'Actions' timeline – this will be setting dependent.
 - Actions must be measurable as complete or not complete.
- Identify groups for the pilot.
- Get head of centre's approval.
- Deliver necessary CPD.
- Teaching Practice:
 - Use once a month
 - Add urls to SOW
 - Assess ongoing impact on classroom practice and student progress
- Evaluation – staff and student
- On-going plan.

In Summary

Preparation

- Canvas support.
- Identify key players in the Central Executive Team.
- Create your pitch.

Delivery

- Deliver your pitch.
- Manage rollout.
- Move forward

Any questions
